### Projects

- EcommerceStore(<https://github.com/Jawadahmad9938/ecommerce-mern-stack-semester-project.git>)  
Jawad Store is an online e-commerce platform where users can browse, search, and purchase products seamlessly. Built with a MERN stack backend and a simple HTML, CSS, and JavaScript frontend, it offers a smooth shopping experience with user authentication and a local database for managing products and orders. Hosted on Netlify for easy accessibility.
- Password Generator in JS (<https://github.com/Jawadahmad9938/Password-Generator-in-jS.git>)  
This is a simple yet effective password generator built with JavaScript. It allows users to create strong, random passwords with customizable length and character options.
- Unsplash-API-Calling-in-JS (<https://github.com/Jawadahmad9938/Unsplash-API-Calling-in-JS.git>)  
A JavaScript project that integrates the Unsplash API to fetch and display high-quality images dynamically based on user searches.
- Phone-Book (<https://github.com/Jawadahmad9938/PhoneBook-Semester-Project.git>)  
A simple Phone Book application for managing contacts, built as a semester project.
- Restaurant-Management-System (<https://github.com/Jawadahmad9938/Restaurant-Management-System.git>)  
A Restaurant Management System for efficiently handling orders, menus, and staff operations.
